

In PURSUIT of Excellence

PURSUIT is designed to provide learning experiences that enhance higher order thinking. PURSUIT students engage in learning opportunities that take them beyond the classroom and prepare them for higher education, work, and engagement in a complex and rapidly changing world.

Highly capable students are stimulated with challenging real world extension and enhancement opportunities; delivered in collaboration with partner universities and organisations. PURSUIT activities typically include field excursions, community events, specialist workshops, seminars, competitions, guest speakers/presenters and camps

Our mission is to pursue learning excellence beyond the core curriculum, to create change makers of the future. Our students will change the world: one innovation at a time.

STEM

The STEM PURSUIT provides opportunities for students to engage with the principles of science, mathematics, technology and engineering, to extend and enhance their skills in real world contexts.

ENTERPRISE

The Enterprise PURSUIT centres on the principles of innovation, digital technologies, business, economics, design and entrepreneurship to provide students with real world extension opportunities.

GLOBAL

The Global PURSUIT extends and enhances students within the principles of communication, connection, sustainability, ethics, and politics to provide them with immersive opportunities to become active and informed global citizens.
