Welcome

Welcome to North Lakes State College. We wish you well as you begin your learning journey with us and travel from Prep to Year 6.

During the early years, students develop the foundations for learning. Literacy and numeracy are the core business of the early years and with this solid foundation, we are able to provide quality learning pathways that allow students to progress successfully into middle primary. The foundations of literacy and numeracy gained in the early years of learning are developed into more sophisticated skills in middle primary, which enable further learning in each subject area.

As students transition into middle and upper primary, students begin to investigate the larger world beyond home and school and the need to develop as autonomous learners. Students in Years 3 to 6 have distinctive and diverse needs which stem from the very significant developmental changes during this period, as well as from individual students' life circumstances, interests, skills and talents.

The primary section of our College falls into two distinct stages, Prep to Year 2 and Year 3 to Year 6.

The first stage, Prep to Year 2, involves the transition from the early foundational years where they develop and consolidate the foundations of literacy and numeracy. This is a time of expanding curiosity and eager exploration of a broader and deeper range of learning experiences.

The second stage, Year 3 to Year 6, is characterised by the demands of the intense physical, social, emotional and intellectual development of early adolescence. There is considerable diversity in how and when students move through this stage and the impact on their attitude to and success in learning. Increasing literacy and numeracy skills and knowledge are the essential ingredients for learning in every subject and for effective communication and participation in adult life. It is essential to maintain students' interest and motivation and provide opportunities for them to continue to engage to fully prepare them for high school.

Prep to Year 6 Curriculum

As a Prep to Year 12 College, with well-established tertiary pathways, North Lakes State College embodies the philosophy of life-long learning. This learning journey begins in the early years and is reflected in our curriculum, pedagogy and assessment practices and provides students with the skills to achieve their individual potential.

Literacy and Numeracy

In Prep to Year 6 we:

- Value reading, writing and numeracy and their role in developing and empowering each and every child in their lifelong journey of learning
- Continuously monitor and assess to identify student needs and facilitate learning
- Implement explicit teaching practices within the delivery of daily reading programs
- Include the three aspects of a balanced numeracy program (mental computations, explicit teaching focus, independent learning), incorporating strategies that focus on connecting mathematics with students' real-world context
- Expect high levels of achievement appropriate for each child
- Promote the use of concrete materials and real-world contexts in Mathematics.

Year level teaching teams plan purposefully, reflect on student work and use class, year level and systemic data to tailor learning activities based on the needs of their students. A key component of our academic success lies in the differentiation of our programs and the wide range of subjects offered to students. Students in Prep to Year 2 have the unique opportunity to study specialist subjects such as Music, Health and Physical Education and Perceptual Motor Programs. In Years 3 to 6, the specialist subjects studied are Music, Visual Arts, Dance, Drama, Health and Physical Education and Chinese (Years 5 and 6 only).

Australian Curriculum

The Australian Curriculum is designed to help all young Australians to become successful learners, confident and creative individuals, and active and informed citizens. Presented as a developmental sequence of learning from Foundation - Year 10, the Australian Curriculum describes to teachers, parents, students and others in the wider community what is to be taught and the quality of learning expected of young people as they progress through school.

The three-dimensional design of the Foundation – Year 10 Australian Curriculum recognises the importance of disciplinary knowledge, skills and understanding alongside general capabilities and cross-curriculum priorities. Disciplinary knowledge, skills and understanding are described in the eight learning areas of the Australian Curriculum: English, Mathematics, Science, Health and Physical Education, Humanities and Social Sciences, The Arts, Technologies and Languages.

iLearn

To prepare students for a future that demands high levels of digital literacy, the iPad will be the device of choice for students in Years 4-6 in 2026.

The aim of the iLearn program is to capitalise on the relevance of technology to modern day learning. The iLearn program will provide learning opportunities that incorporate a range of iPad applications for increased engagement within the classroom.

Students will increase their digital competence by using a range of productivity applications such as 'Pages', 'Word' and 'Keynote'. They will be provided with various options to demonstrate their understanding through creative applications such as 'Clips' or 'Sketches School'. Student will use the iPad everyday and it will form an essential part of the way they learn and demonstrate their understanding.

Signature Dance

As part of North Lakes State College's Signature Program, we offer a highly successful extension dance program from Prep to Year 12 for students who are considering the possibility of a career based around the dance industry.

Entry into this program is through audition in Term 1 only. There are three troupes running within the College: Lil/Mid Kicks (Prep to Year 6), and Kicks (Year 7 to Year 12). These troupes perform at various competitions and events throughout the year ranging from Eisteddfods to the North Lakes State College Arts Showcase evening. The troupes have demonstrated excellence in their practice, winning a multitude of awards since their inception in 2005. Within the troupes the students learn from qualified dance teachers with a fee to cover costumes and eisteddfod entries. Students require a team uniform, tights and dance shoes at their own expense.

Goals of Program

- To continue the development of North Lakes State College Dance students to provide them with tools necessary to forge a career in Dance.
- To further develop the performance skills of Dance students through a variety of opportunities such as: Eisteddfods, Choreographic Development, Mentoring for younger students and other performance opportunities for various community and schooling events.
- To provide intensive specialised training for dance students and assist them in the understanding of how to improve and develop as a dancer.

Eligibility Criteria

Entry via audition showing:

- Demonstration of outstanding behaviour and understanding of Prep to Year 12 Culture in College life
- Evidence of high level of motivation and commitment to Dance through attendance, participation, personal philosophy and performance
- Commitment to academic studies
- High level of Dance and performance ability.

Choral Program

The North Lakes Choral Program is designed to foster creativity and support students' overall wellbeing through the joy of music and performance. A key element of the program is group singing, which has been shown to improve emotional health, encourage teamwork, and build confidence while allowing students to express themselves in a creative and supportive environment. Singing together strengthens community bonds, teaches listening and collaboration, and sparks creative thinking - all essential skills for lifelong learning.

Throughout the year, our choirs perform at various college events and community performances, showcasing our students' talents and celebrating their hard work. To cater for all ages, we offer three age-appropriate choirs:

- Years 1–2 Choir
- Years 3–6 Choir
- Secondary Vocal Group (Years 7–12)

Eligibility & Commitment:

The choirs are open to all students who love to sing (no audition required) and are willing to commit to attending weekly rehearsals. Participants must complete a consent form and sign a contract agreeing to regular attendance.

Program Cost:

The program involves a \$50 annual extracurricular fee, supporting music resources and performance opportunities for our singers.

Instrumental Music

The Instrumental Music Program at North Lakes State College offers students a dynamic and enriching opportunity to develop their musical skills while fostering creativity, confidence, and teamwork. Open to students from year 3 (for strings) and year 4 (for band) through to year 12, the program provides expert tuition in woodwind, brass, percussion, and string instruments. Students participate in weekly lessons and ensemble rehearsals, with opportunities to perform at school concerts, community events, and regional competitions. Whether students are beginning their musical journey or refining advanced skills, the program is designed to nurture their love of music in a supportive and inspiring environment.

Goals of the Program

- Develop technical and artistic skills on a chosen instrument
- Foster discipline, confidence, and self-expression
- Build ensemble and collaboration skills
- Encourage a lifelong appreciation of music
- Promote teamwork, leadership, and personal growth

Eligibility & Commitment

- Strings: Open from Year 3
- Band instruments: Open from Year 4
- Students may hire a school instrument in their first year (subject to availability); most are expected to purchase their own after that, except for larger instruments
- Students must complete an Expression of Interest Form and attend an interview with specialist staff to assess suitability for the program
- Places are limited; submission does not guarantee entry
- Students must commit to regular home practice and attend before-school ensemble rehearsals.

Program Costs

- \$75 annual program levy
- \$75 annual hire fee (if using a school instrument)

Support Programs

Students with specific social, emotional, physical and academic needs are supported by specialist staff in our Student Learning Centre (SLC). The College works within an inclusive education model where specialist teachers and teacher aides work with class teachers to make educational adjustments to meet the learning needs of the student. Our philosophy on inclusive education is based on recognizing and responding to individual differences and ensuring programs of support are offered to meet the individual needs of the student. Levels of support provided are commensurate with the degree of difficulty being experienced.

Student Code of Conduct

All areas of North Lakes State College are learning and teaching environments. We consider behaviour management to be an opportunity for valuable social learning, as well as a means of maximising the success of academic education programs.

Our Student Code of Conduct Plan for Students outlines our system for facilitating positive behaviours, preventing problem behaviour and responding to unacceptable behaviours. Shared expectations for student behaviour enables the College to maintain and create a positive, productive learning and teaching environment, where all College community members have clear and consistent expectations, and an understanding of their role in the educational process.

At North Lakes State College, behaviour management is underpinned by our College motto and values:

COLLEGE MOTTO		
LEARN	LEAD	SUCCEED

COLLEGE VALUES		
CHOICE	COURAGE	RESPECT

Our College values have been agreed upon and endorsed by all staff and our College P&C Association. They are aligned with the values, principles and expected standards outlined in Education Queensland's Student Code of Conduct policy

Student Reports

North Lakes State College provides reporting to ensure meaningful communication about student achievement occurs in a variety of modes, to a range of stakeholders. Reporting includes a teacher's professional judgement about an individual student's demonstration of the achievement standard and is based on relevant assessment items collected from students throughout the semester.

Each year, parents are provided with opportunities to meet the child's teacher for two parent-teacher interviews. Parents are always welcome to contact their student's teacher to make an appointment to discuss student achievement and welfare throughout the year.

Parents will receive a progress report for English, Science and Mathematics at the end of Term 1 and 3 and each semester, a formal report card is issued to provide students and families with a summative review of their achievements. Reporting provides parents with opportunities to meaningfully participate in discussions about their student's ongoing achievement. Progressive assessment is undertaken by students throughout the year. Assessment is used at North Lakes State College to provide information for further learning. Where appropriate, results are shared with parents immediately, especially if there is concern around student achievement.

For students on an ICP, achievement is reported on at the appropriate level within the students' academic report each semester.
